**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

**1. Business**

Cara Therapeutics, Inc. (the “Company”, “we”, “our” or “us”) is a clinical-stage biopharmaceutical corporation formed on July 2, 2004. The Company is focused on developing and commercializing new chemical entities designed to alleviate pain by selectively targeting kappa opioid receptors. Our primary activities to date have been organizing and staffing our company, developing our product candidates, including conducting preclinical studies and clinical trials of CR845-based product candidates and raising capital.

On January 30, 2014, the Company’s registration statement on Form S-1 (File No 333-192230) was declared effective by the Securities and Exchange Commission (“SEC”) for its initial public offering (“IPO”), pursuant to which the Company registered the offering and sale of 5,750,000 shares of its common stock (including 750,000 shares upon exercise of an option by the underwriters) at a public offering price of \$11.00 per share for aggregate gross offering proceeds of \$63,250. As a result of the IPO, the Company received net proceeds of approximately \$56,247 from the sale of 5,750,000 shares of its common stock, after deducting \$4,427 of underwriting discounts and commissions and \$2,576 of offering expenses, which had been paid or accrued as of June 30, 2014.

Prior to the IPO, the Company raised several rounds of equity financing and issued debt, resulting in aggregate net proceeds of approximately \$73,309 through December 31, 2013. Upon closing of the IPO, all outstanding shares of the Company’s convertible preferred stock were automatically converted to shares of the Company’s common stock (see Note 8). The Company has incurred substantial losses and negative cash flows from operating activities in nearly every fiscal period since inception, and expects operating losses and negative cash flows to continue into the foreseeable future.

As of June 30, 2014, the Company has unrestricted cash and cash equivalents of \$62,812 and an accumulated deficit of \$(69,484). The Company had net cash (used in) provided by operating activities of \$(7,330) and \$11,334 for the six months ended June 30, 2014 and 2013, respectively. The Company expects that cash and cash equivalents at June 30, 2014 will be sufficient to fund its operations beyond one year. The Company recognized net (loss) income of \$(3,645) and \$5,337 for the three months ended June 30, 2014 and 2013, respectively, and \$(7,028) and \$2,705 for the six months ended June 30, 2014 and 2013, respectively, and expects to incur additional losses for the full year ending December 31, 2014.

The Company is subject to risks common to other life science companies including, but not limited to, uncertainty of product development and commercialization, lack of marketing and sales history, development by its competitors of new technological innovations, dependence on key personnel, market acceptance of products, product liability protection of proprietary technology, ability to raise additional financing, and compliance with Food and Drug Administration (“FDA”) and other government regulations. If the Company does not successfully commercialize any of its product candidates, it will be unable to generate recurring product revenue or achieve profitability.

**2. Basis of Presentation**

The unaudited interim condensed financial statements included herein have been prepared pursuant to the rules and regulations of the SEC. Accordingly, they do not include all information and disclosures necessary for a presentation of the Company’s financial position, results of operations and cash flows in conformity with generally accepted accounting principles in the United States of America (“GAAP”). In the opinion of management, these unaudited interim financial statements reflect all adjustments, consisting primarily of normal recurring accruals, necessary for a fair presentation of results for the periods presented. The results of operations for interim periods are not necessarily indicative of the results for the full year. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted from this report, as is permitted by SEC rules and regulations; however, the Company believes that the disclosures are adequate to make the information presented not misleading. The condensed balance sheet data for the year ended December 31, 2013 were derived from audited financial statements, but do not include all disclosures required by GAAP. These unaudited interim condensed financial statements should be read in conjunction with the audited financial statements and accompanying notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

**Use of Estimates**

The preparation of financial statements in conformity with GAAP requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities, as of the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from the Company's estimates and assumptions. Significant estimates include useful lives of fixed assets, the periods over which certain revenues will be recognized, including licensing and collaborative revenue recognized from non-refundable up-front payments, the amount of non-cash compensation costs related to share-based payments to employees and non-employees and the periods over which those costs are expensed and the likelihood of realization of deferred tax assets.

There have been no material changes to the significant accounting policies previously disclosed in Note 2 to the Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

**Recent Accounting Pronouncement**

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update 2014-09, *Revenue from Contracts with Customers (Topic 606)* ("ASU 2014-09"). ASU 2014-09 provides a single authoritative source of guidance and, thereby, is meant to significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets. ASU 2014-09 changes the principle under which the Company will recognize revenue from contracts with customers from one which requires the Company to satisfy specific criteria before recognizing revenue to one which requires the Company to recognize revenue in an amount that reflects the consideration to which it expects to be entitled in exchange for the transfer of promised goods or services to customers. The amount of revenue to be recognized in any reporting period is determined by applying the following steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract and (5) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 is effective for the Company for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period (i.e., January 1, 2017). Early application is not permitted. The Company is allowed to adopt ASU 2014-09 either (1) retrospectively to each prior reporting period presented using several practical expedients related to completed contracts and required disclosures, or (2) retrospectively with the cumulative effect of initially applying ASU 2014-09 recognized at the date of initial application, including disclosure of the effect of using this method of adoption on the financial statement line items. The Company is currently in the process of deciding which method of adoption it will use and the effect of adoption of ASU 2014-09 on its results of operations, financial position and cash flows.

**3. Fair Value Measurements**

As of June 30, 2014 and December 31, 2013, the Company's financial instruments consist of cash and cash equivalents, restricted cash, accounts payable and accrued liabilities. The carrying amount of each of those financial instruments is generally considered to be representative of their respective fair values because of the short-term nature of those instruments.

Current accounting guidance defines fair value, establishes a framework for measuring fair value in accordance with Accounting Standards Codification ("ASC") section 820, and requires certain disclosures about fair value measurements.

The valuation techniques included in the guidance are based on observable and unobservable inputs. Observable inputs reflect readily obtainable data from independent sources, while unobservable inputs reflect market assumptions and are classified into the following fair value hierarchy:

- Level 1 – Observable inputs – quoted prices in active markets for identical assets and liabilities.

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

- Level 2 – Observable inputs other than the quoted prices in active markets for identical assets and liabilities – such as quoted prices for similar instruments, quoted prices for identical or similar instruments in inactive markets, or other inputs that are observable or can be corroborated by observable market data.
- Level 3 – Unobservable inputs – includes amounts derived from valuation models where one or more significant inputs are unobservable and require the company to develop relevant assumptions.

The following table summarizes the financial assets measured at fair value on a recurring basis as of June 30, 2014 and December 31, 2013.

	<u>June 30, 2014</u>	<u>December 31, 2013</u>
	<u>Level 1</u>	<u>Level 1</u>
<b>Financial assets</b>		
Cash equivalents:		
Money market funds	\$ 62,812	\$ 12,357
Restricted cash:		
Bank certificate of deposit	700	700
Total	<u>\$ 63,512</u>	<u>\$ 13,057</u>

#### 4. Prepaid expenses and other current assets

As of June 30, 2014, prepaid expenses and other current assets was \$1,706, consisting of \$399 of prepaid insurance, \$1,298 of research and development (“R&D”) clinical costs and \$9 of other costs. As of December 31, 2013, prepaid expenses and other current assets was \$2,140, consisting of \$1,833 of IPO costs, \$262 of R&D clinical costs, \$34 of prepaid insurance and \$11 of other costs.

#### 5. Revenue Recognition

In general, the Company recognizes revenue when all of the following criteria are met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; the Company’s price to the customer is fixed or determinable and collectability is reasonably assured.

The Company has entered into license agreements to develop, manufacture and commercialize drug products. The terms of these agreements typically contain multiple elements, including licenses and research and development services. Payments to the Company under these agreements may include nonrefundable license fees, payments for research activities, payments based upon the achievement of certain milestones and royalties on any resulting net product sales. There are no performance, cancellation, termination or refund provisions in any of the arrangements that contain material financial consequences to the Company.

The Company records revenue related to these agreements in accordance with ASC 605-25, *Revenue Recognition Multiple-Element Arrangements*. In order to account for these agreements, the Company identifies the deliverables included within the arrangement and evaluates which deliverables represent separate units of accounting based on whether certain criteria are met, including whether the delivered element has stand-alone value to the counterparty. The consideration received is then allocated among the separate units of accounting based on each unit’s relative selling price. The identification of individual elements in a multiple-element arrangement and the estimation of the selling price of each element involve significant judgment, including consideration as to whether each delivered element has standalone value.

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

Arrangement consideration allocated to license deliverables that represent separate units of accounting are recognized as revenue at the outset of the agreement assuming the general criteria for revenue recognition noted above have been met. Arrangement consideration allocated to license deliverables that do not represent separate units of accounting are deferred. The Company has determined that its license deliverables represent separate units of accounting.

Arrangement consideration allocated to research and development services that represent separate units of accounting are recognized as the services are performed, assuming the general criteria for revenue recognition noted above have been met. The Company has determined that its research and developments services deliverables, as applicable, represent separate units of accounting.

The Company's license agreements include contingent milestone payments related to specified clinical development milestones and regulatory milestones. The Company generally considers non-refundable development and regulatory milestones that the Company expects to be achieved as a result of the Company's efforts during the period of the Company's performance obligations under the license and research agreements to be substantive and recognizes them as revenue upon the achievement of the milestone, assuming all other revenue recognition criteria are met. If such milestones are not considered to be substantive because the Company does not contribute effort to their achievement, the Company initially defers those milestone payments, allocates them to the units of accounting and recognizes them as revenue over the remaining term of those performance obligations. If no such performance obligation exists, milestone payments that are not considered substantive are generally recognized as revenue upon achievement, assuming all other revenue recognition criteria are met.

*Maruishi Pharmaceutical Co., Ltd.*

In April 2013, the Company entered into a license agreement with Maruishi Pharmaceutical Co., Ltd. ("Maruishi") under which the Company granted Maruishi an exclusive license to develop, manufacture, and commercialize drug products containing CR845 for acute pain and uremic pruritus in Japan. The Company and Maruishi are responsible to use commercially reasonable efforts, at their own expense, to develop, obtain regulatory approval for and commercialize CR845 in the United States and Japan, respectively. In addition, the Company will provide Maruishi specific clinical development services for CR845 used in Maruishi's field of use.

Under the terms of this license agreement, the Company received an upfront non-refundable, non-creditable license fee of \$15,000. Also, in conjunction with this arrangement Maruishi purchased 2,105,263 shares of Junior A convertible preferred stock of the Company pursuant to a stock purchase agreement for a purchase price of \$8,000. These shares were recorded at their fair value of \$7,663. As a result, the premium of \$337 was allocated to the arrangement consideration.

The Company has identified two deliverables under ASC 605-25: (1) the license; and (2) the R&D services specific to the uremic pruritus field of use. The Company has determined that the license has standalone value because Maruishi has the right to sublicense and manufacture CR845 in Japan. The second deliverable is the R&D services, which also have standalone value as similar services are sold separately by other vendors. Since both the license and the R&D services separability criteria have been met, they are being accounted for as separate units of accounting at the outset of the arrangement.

Along with the R&D services performed by the Company for Maruishi, the Company supplies Maruishi with CR845 clinical material as an accommodation. The Company has entered into manufacturing and service agreements with third parties to manufacture CR845. Payments made by the Company to third parties based on firm and fixed commitments by Maruishi to purchase CR845 from the Company are capitalized as prepaid expense. During the manufacturing process, title and risk of loss remains with the third party until the Company has paid in full for the material.

Once the Company has title to the CR845 and has delivered it to Maruishi, prepaid expense related to that CR845 is reduced with an offset to R&D expense. At that time, Maruishi reimburses the Company for its external and internal costs for purchasing CR845 and processing the sale to Maruishi and the Company recognizes collaborative revenue for the reimbursement amount. Deposits received from Maruishi prior to delivery of CR845 are recorded as deferred revenue.

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

Under the terms of the license agreement, the Company is also entitled to receive aggregate milestone payments of \$8,000 for events performed by Maruishi in Japan and \$2,500 for events performed by the Company in the U.S. At the time of execution of this license agreement, there was significant uncertainty as to whether the stated milestones would be achieved. In conjunction with this uncertainty, the Company has determined that the milestones achieved in the U.S. are substantive in nature as they are commensurate with the enhancement of value of the delivered license as they relate to clinical success and advancement within the FDA drug development platform. The Company will account for those milestone payments under ASC 605 *Revenue Recognition – Milestone Method*. However, the milestones achieved by Maruishi in Japan are not substantive and will be accounted for as contingent consideration.

During June 2014, Maruishi completed a Phase 1 clinical trial in Japan related to CR845 in acute post-operative pain, which constituted achievement of one of the milestones specified in the license agreement. As the milestone was considered not to be substantive, the payment was accounted for as contingent consideration. Accordingly, the Company allocated the non-refundable contingent payment of \$480, net of a contractual foreign currency exchange adjustment, to the two deliverables in the same proportion as the initial upfront payment had been allocated. The portion of the contingent payment allocated to the previously delivered license deliverable was recognized as license revenue entirely during the three months ended June 30, 2014. The portion of the contingent payment allocated to the R&D services deliverable was recognized as collaborative revenue during the three months ended June 30, 2014 to the extent of R&D services previously provided and the remainder was deferred. The payment due from Maruishi was recorded as Other receivable.

As of June 30, 2014 and December 31, 2013, the Company had \$3,069 and \$3,475, respectively, of deferred revenue pursuant to the R&D services deliverable under the license agreement with Maruishi.

During the three months ended June 30, 2014 and 2013, the Company recognized \$302 and \$9,637, respectively, of license fee revenue and \$658 and \$336, respectively, of collaborative revenue, including \$526 and \$306, respectively, of amortization of deferred revenue from the portion of the upfront payment received pursuant to the license agreement with Maruishi that was allocated to the R&D services deliverable and \$132 and \$30, respectively, from the sale of CR845 clinical compound.

During the six months ended June 30, 2014 and 2013, the Company recognized \$302 and \$9,637, respectively, of license fee revenue and \$836 and \$336, respectively, of collaborative revenue, including \$677 and \$306, respectively, of amortization of deferred revenue from the portion of the upfront payment received pursuant to the license agreement with Maruishi that was allocated to the R&D services deliverable and \$159 and \$30, respectively, from the sale of CR845 clinical compound.

The Company incurred R&D expense related to the Maruishi license agreement of \$714 and \$1,112 during the three and six months ended June 30, 2014, respectively, and \$352 during both the three and six months ended June 30, 2013.

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

**6. Accounts Payable and Accrued Expenses**

Accounts payable and accrued expenses consist of the following:

	<b>June 30, 2014</b>	<b>December 31, 2013</b>
Accounts payable	\$ 1,191	\$ 676
Accrued research projects	755	405
Accrued professional fees	227	739
Accrued compensation and benefits	239	83
Accrued other	136	55
Total	<u>\$ 2,548</u>	<u>\$ 1,958</u>

**7. Net (Loss) Income Per Share**

The Company computes basic net (loss) income per share using the “two-class” method, which includes the weighted-average number of common stock outstanding during the period and other securities that participate in dividends (a participating security). Prior to the closing of the IPO, the Company’s shares of convertible preferred stock were participating securities as defined by ASC 260-10, *Earnings Per Share*. Under the two-class method, basic net (loss) income per share applicable to common stockholders is computed by dividing the net (loss) income applicable to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted net (loss) income per share is computed using the more dilutive of (1) the two-class method, or (2) the “if-converted” method. The Company allocates net earnings on a pari passu (equal) basis to both common and preferred stockholders. Net losses are not allocated to preferred stockholders as they have no obligation to share in the Company’s net losses.

Diluted net (loss) income per share gives effect to all potentially dilutive securities, including convertible preferred stock, convertible promissory notes and shares issuable upon the exercise of outstanding stock options and warrants, using the treasury stock method. For the three and six months ended June 30, 2014 and 2013, the Company excluded the effects of potentially dilutive shares that were outstanding during those respective periods from the denominator when their inclusion would be anti-dilutive, including for periods during which the Company generated net losses.

The denominators used in the net (loss) income per share computations are as follows:

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2014</b>	<b>2013</b>	<b>2014</b>	<b>2013</b>
<b>Basic:</b>				
Weighted average common shares outstanding	<u>22,608,324</u>	<u>4,288,243</u>	<u>19,150,412</u>	<u>3,975,463</u>
<b>Diluted:</b>				
Weighted average common shares outstanding	22,608,324	4,288,243	19,150,412	3,975,463
Convertible preferred stock*	—	11,245,907	—	11,255,016
Common stock options*	—	438,299	—	438,299
Common stock warrants*	—	—	—	—
Convertible promissory notes (as if converted)*	—	—	—	—
Denominator for diluted net (loss) income per share available to common stockholders	<u>22,608,324</u>	<u>15,972,449</u>	<u>19,150,412</u>	<u>15,668,778</u>

\* No amounts were considered if their effects would be anti-dilutive.

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

Basic and diluted net (loss) income per share attributable to common stockholders are computed as follows:

	<u>Three Months Ended June 30,</u>		<u>Six Months Ended June 30,</u>	
	<u>2014</u>	<u>2013</u>	<u>2014</u>	<u>2013</u>
Net (loss) income	\$ (3,645)	\$ 5,337	\$ (7,028)	\$ 2,705
Add back: extinguishment of preferred shares	—	—	—	891
Less: net income attributable to participating securities	—	(3,869)	—	(2,656)
Net (loss) income attributable to common stockholders - Basic	(3,645)	1,468	(7,028)	940
Add: net income attributable to participating securities	—	3,869	—	2,656
Net (loss) income attributable to common stockholders - Diluted	<u>\$ (3,645)</u>	<u>\$ 5,337</u>	<u>\$ (7,028)</u>	<u>\$ 3,596</u>
Net (loss) income per share attributable to common stockholders				
Basic	\$ (0.16)	\$ 0.34	\$ (0.37)	\$ 0.24
Diluted	\$ (0.16)	\$ 0.33	\$ (0.37)	\$ 0.23
Weighted-average common shares outstanding attributable to common stockholders:				
Basic	22,608,324	4,288,243	19,150,412	3,975,463
Diluted	22,608,324	15,972,449	19,150,412	15,668,778

Securities outstanding at the end of the respective periods presented below, that could potentially dilute basic earnings per share in the future, that were not included in the computation of diluted net loss per share because to do so would have been antidilutive are as follows:

	<u>June 30,</u>	
	<u>2014</u>	<u>2013</u>
Convertible preferred stock	—	—
Common stock options	1,058,160	—
Common stock warrants	19,851	19,851
Convertible promissory notes	—	1,126,517
Total	<u>1,078,011</u>	<u>1,146,368</u>

All shares of the Company's convertible preferred stock were automatically converted to shares of the Company's common stock upon the closing of the IPO on February 5, 2014 (see Note 8). All convertible promissory notes were either converted into shares of the Company's Series D convertible preferred stock or repaid in cash by December 31, 2013.

**8. Convertible Preferred Stock**

As of December 31, 2013, the Company had authorized an aggregate of 29,402,200 shares of convertible preferred stock, par value \$0.001 per share. Upon the closing of the Company's IPO on February 5, 2014, all 29,186,929 shares of the Company's convertible preferred stock that were issued and outstanding on that date were automatically converted into an aggregate of 12,554,171 shares of its common stock. As of June 30, 2014, there were no shares of convertible preferred stock authorized or outstanding.

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

**9. Reverse Stock Split**

The Company's Board of Directors and stockholders approved a 1-for-2.5 reverse stock split of the Company's common stock effective on January 16, 2014, which resulted in an adjustment to the preferred stock conversion price to reflect a proportional decrease in the number of shares of common stock to be issued upon conversion. All share and per share data in the unaudited interim condensed financial statements and accompanying notes thereto included in this Quarterly Report on Form 10-Q have been retroactively adjusted for all periods presented to give effect to this reverse stock split.

**10. Stockholders' (Deficit) Equity**

On January 16, 2014, the Company's Board of Directors approved an Amended and Restated Certificate of Incorporation, which, among other things, increased the authorized number of shares of the Company's common stock, par value \$0.001 per share, from 50,000,000 to 100,000,000 and authorized 5,000,000 shares of undesignated preferred stock, par value \$0.001 per share, that may be issued from time to time by the Board of Directors of the Company in one or more series. As of June 30, 2014, there were 22,638,414 shares of common stock and no shares of preferred stock issued and outstanding.

**11. Stock-Based Compensation**

*2014 Equity Incentive Plan*

The Company's Board of Directors adopted, and its stockholders subsequently approved, its 2014 Equity Incentive Plan (the "2014 Plan") in January 2014. The 2014 Plan became effective immediately upon the signing of the underwriting agreement for the Company's initial public offering. The 2014 Plan is administered by the Company's Board of Directors or a duly authorized committee thereof (the "Plan administrator"). The 2014 Plan provides for the grant of incentive stock options, non-statutory stock options, restricted stock awards, restricted stock unit awards, stock appreciation rights, performance stock awards and other forms of equity compensation (collectively, "Stock Awards"). Additionally, the 2014 Plan provides for the grant of performance cash awards. Incentive stock options may be granted only to employees. All other awards may be granted to employees, including officers, non-employee directors, and consultants. No incentive stock options may be granted under the 2014 Plan after the tenth anniversary of the effective date of the 2014 Plan. Stock Awards granted under the 2014 Plan vest at the rate specified by the Plan administrator. The Plan administrator determines the term of Stock Awards granted under the 2014 Plan up to a maximum of ten years.

Initially, the aggregate number of shares of the Company's common stock that may be issued pursuant to Stock Awards under the 2014 Plan is 1,600,000 shares. Additionally, the number of shares of the Company's common stock reserved for issuance under the 2014 Plan will automatically increase on January 1 of each year, beginning on January 1, 2015 and continuing through and including January 1, 2024, by 3% of the total number of shares of the Company's capital stock outstanding on December 31 of the preceding calendar year, or a lesser number of shares determined by the Company's Board of Directors. The maximum number of shares that may be issued pursuant to the exercise of incentive stock options under the 2014 Plan is 30,000,000 shares.

*2004 Stock Incentive Plan*

Under the 2004 Stock Incentive Plan ("2004 Plan"), the Company has granted stock options to selected officers, employees and consultants of the Company. As of December 31 2013, options to purchase 490,160 shares of common stock were outstanding under the 2004 Plan, with a weighted average exercise price per share of \$1.34. Although as of December 31 2013, 757,799 shares remained available for future issuance pursuant to the grant of options or restricted share awards under the 2004 Plan, following the effectiveness of the 2014 Plan in January 2014, no additional options or restricted share awards have been or will be granted under the 2004 Plan. The 2014 Plan and 2004 Plan are referred to collectively as the Stock Incentive Plans.

Under the Stock Incentive Plans, the Company granted 227,000 and 614,000 stock options during the three and six months ended June 30, 2014, respectively, and no stock options during the three and six months ended June 30, 2013. The fair values of stock options granted during the three and six months ended June 30, 2014 were estimated as of the dates of grant using the Black-Scholes option pricing model with the following assumptions:

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

	<b>Three Months Ended June 30, 2014</b>	<b>Six Months Ended June 30, 2014</b>
Risk-free interest rate	1.80% - 1.99%	1.80% - 2.72%
Expected volatility	65%	65% - 71%
Expected dividend yield	0%	0%
Expected life of employee options (in years)	6.25	6.25
Expected life of nonemployee options (in years)	10	10

The weighted average grant date fair value of options granted to employees and members of the Board of Directors for their Board service during the three and six months ended June 30, 2014 was \$8.53 and \$7.55, respectively. The fair value of options granted to nonemployee consultants, which is marked to market at each reporting date in accordance with ASC 505-50, was \$13.70 at June 30, 2014.

During the three and six months ended June 30, 2014 and 2013, the Company recognized compensation expense relating to stock options, as follows:

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2014</b>	<b>2013</b>	<b>2014</b>	<b>2013</b>
Research and development	\$ 159	\$ 23	\$ 231	\$ 31
General and administrative	297	17	578	20
Total stock option expense	<u>\$ 456</u>	<u>\$ 40</u>	<u>\$ 809</u>	<u>\$ 51</u>

A summary of stock option award activity under the Company's Stock Incentive Plans as of and for the six months ended June 30, 2014 is presented below:

	<b>Number of Shares</b>	<b>Weighted Average Exercise Price</b>
Outstanding, December 31, 2013	490,160	\$ 1.34
Granted	614,000	12.11
Exercised	(46,000)	0.64
Outstanding, June 30, 2014	<u>1,058,160</u>	7.62
Options exercisable, June 30, 2014	<u>476,451</u>	\$ 2.43

**CARA THERAPEUTICS, INC.**  
**NOTES TO CONDENSED FINANCIAL STATEMENTS**  
**(amounts in thousands, except share and per share data)**  
**(unaudited)**

**12. Income Taxes**

For the three months ended June 30, 2014 and 2013, pre-tax (loss) income was \$(3,656) and \$5,317, respectively, and for the six months ended June 30, 2014 and 2013, pre-tax (loss) income was \$(7,055) and \$2,678, respectively. The Company recognized a full tax valuation allowance against net deferred tax assets at June 30, 2014 and December 31, 2013.

The benefit from income taxes of \$11 and \$20 for the three months ended June 30, 2014 and 2013, respectively, and \$27 and \$27 for the six months ended June 30, 2014 and 2013, respectively, relates to state research and development tax credits exchanged for cash pursuant to the Connecticut Research and Development Tax Credit Exchange Program, which permits qualified small businesses engaged in research and development activities within Connecticut to exchange their unused research and development tax credits for a cash amount equal to 65% of the value of the exchanged credits.

**13. Commitments and Contingencies**

Contractual obligations and commitments as of June 30, 2014 were as follows:

	Payment Due for the Year Ending					Thereafter	Total
	December 31,						
	2014	2015	2016	2017	2018		
Operating lease (1)	\$430	\$ 886	\$ 913	\$ 740	\$ —	\$ —	\$2,969
Employment agreements (2)	476	952	952	952	952	—	4,284
Total	<u>\$906</u>	<u>\$1,838</u>	<u>\$1,865</u>	<u>\$1,692</u>	<u>\$952</u>	<u>\$ —</u>	<u>\$7,253</u>

- (1) The Company leases its operating facility located in Shelton, Connecticut.
- (2) Effective January 2014, the Company entered into employment agreements with three of its executive officers. Each such employment agreement has a term of four years and is renewable on the same terms for one additional year unless the executive officer party to such agreement notifies the Company in writing not to renew. Under these employment agreements, each executive officer is eligible for severance benefits in specified circumstances, including 6 to 12 months of salary.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

**Cautionary Note Regarding Forward-Looking Statements**

This Quarterly Report on Form 10-Q contains forward-looking statements, within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, that involve substantial risks and uncertainties. In some cases, you can identify forward-looking statements by the words "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "might," "objective," "ongoing," "plan," "predict," "project," "potential," "should," "will," or "would," and or the negative of these terms, or other comparable terminology intended to identify statements about the future. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from the information expressed or implied by these forward-looking statements. Although we believe that we have a reasonable basis for each forward-looking statement contained in this Quarterly Report on Form 10-Q, we caution you that these statements are based on a combination of facts and factors currently known by us and our expectations of the future, about which we cannot be certain.

The forward-looking statements in this Quarterly Report on Form 10-Q include, among other things, statements about:

- the success and timing of our preclinical studies and clinical trials, including our planned Phase 3 clinical trials for I.V. CR845;
- our plans to develop and commercialize I.V. CR845 and our other product candidates, including Oral CR845;
- our ability to obtain and maintain regulatory approval of our product candidates, including I.V. CR845 and Oral CR845, and the labeling under any approval we may obtain;
- the anticipated commercial launch of our lead product candidate, I.V. CR845;
- the performance of our current and future collaborators, including Maruishi and CKD, and our ability to maintain such collaborations;
- our ability to establish additional collaborations for our product candidates;
- the continued service of our key scientific or management personnel;
- our ability to establish commercialization and marketing capabilities;
- the size and growth of the potential markets for pain management, including the postoperative and chronic pain markets, and our other product candidates and our ability to serve those markets;
- regulatory developments in the United States and foreign countries;
- the rate and degree of market acceptance of any approved products;
- our expectations regarding the period during which we will be an emerging growth company under the JOBS Act;
- our use of the proceeds from our initial public offering, and the clinical milestones we expect to fund with such proceeds;
- the accuracy of our estimates regarding expenses, future revenues and capital requirements;
- our ability to obtain funding for our operations;
- our ability to obtain and maintain intellectual property protection for our product candidates and our ability to operate our business without infringing on the intellectual property rights of others;
- the success of competing drugs that are or become available; and
- the performance of third-party manufacturers and clinical research organizations.

You should refer to Part I Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2013 for a discussion of important factors that may cause our actual results to differ materially from those expressed or implied by our forward-looking statements. As a result of these factors, we cannot assure you that the forward-looking statements in this Quarterly Report on Form 10-Q will prove to be accurate. Furthermore, if our forward-looking statements prove to be inaccurate, the inaccuracy may be material. In light of the significant uncertainties in these forward-looking statements, you should not regard these statements as a representation or warranty by us or any other person that we will achieve our objectives and plans in any specified time frame or at all. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

You should read this Quarterly Report on Form 10-Q and the documents that we reference in this Quarterly Report on Form 10-Q and have filed as exhibits to this Quarterly Report on Form 10-Q completely and with the understanding that our actual future results may be materially different from what we expect. We qualify all of our forward-looking statements by these cautionary statements.

The following *Management's Discussion and Analysis of Financial Condition and Results of Operations* should be read in conjunction with: (i) the Condensed Financial Statements and related notes thereto which are included in this Quarterly Report on Form 10-Q; and (ii) our Annual Report on Form 10-K for the year ended December 31, 2013.

---

## [Table of Contents](#)

### Overview

We are a clinical-stage biopharmaceutical company focused on developing and commercializing new chemical entities designed to alleviate pain and pruritus by selectively targeting kappa opioid receptors. We are developing a novel and proprietary class of product candidates that target the body's peripheral nervous system and have demonstrated efficacy in patients with moderate-to-severe pain without inducing many of the undesirable side effects typically associated with currently available pain therapeutics. Our most advanced product candidate, intravenous, or I.V., CR845, has demonstrated significant pain relief and a favorable safety and tolerability profile in three Phase 2 clinical trials in patients with acute postoperative pain. We plan to request an End of Phase 2 meeting with the Food and Drug Administration ("FDA") in the second half of 2014 to discuss the design of Phase 3 trials for I.V. CR845, in acute pain. Based on timelines for completion of Chemistry, Manufacturing and Controls ("CMC") requirements related to Active Pharmaceutical Ingredient ("API") synthesis and drug product manufacturing, we anticipate initiating Phase 3 trials early in 2015. In addition, we initiated a Human Abuse Liability Study of I.V. CR845 in July 2014 and intend to report top-line data from that study in the fourth quarter of 2014.

We are also developing an oral version of CR845, or Oral CR845, for acute and chronic pain. We have successfully completed a Phase 1 trial of a capsule formulation of Oral CR845 that established oral bioavailability parameters. In June 2014, we initiated a Phase 1 trial of a tablet formulation of Oral CR845 for which we anticipate top-line data in the fourth quarter of 2014. CR845 has exhibited anti-pruritic (anti-itch) potency in standard preclinical models. In June 2014, we filed an IND and in August 2014 we initiated a proof-of-concept Phase 2 study for I.V. CR845 for the treatment of uremic pruritus, a systemic condition with high prevalence in dialysis patients for which there are no approved therapeutics in the U.S. We expect to report top-line data from this trial in the first half of 2015.

We commenced operations in 2004, and our primary activities to date have been organizing and staffing our company, developing our product candidates, including conducting preclinical studies and clinical trials of CR845-based product candidates and raising capital. To date, we have financed our operations primarily through sales of our equity and debt securities and payments from license agreements. We have no products currently available for sale, and substantially all of our revenue to date has been revenue from license agreements, although we have received nominal amounts of revenue under research grants.

Since our inception and through June 30, 2014, we have received net proceeds of \$56.2 million from the sale of 5.75 million shares of our common stock in our initial public offering ("IPO") after deducting underwriting discounts and commissions and offering expenses, net proceeds of \$65.9 million from the sale of various series of convertible preferred stock, \$3.6 million from the issuance of convertible promissory notes and \$3.8 million from the issuance of long-term debt.

In addition to our financing activities, we have received aggregate payments of \$28.9 million and are due an additional \$0.5 million pursuant to license agreements related to CR845 and an earlier product candidate for which development efforts ceased in 2007. Included in those aforementioned payments pursuant to license agreements, in April 2013, we received \$15.0 million as an upfront payment, and as of June 30, 2014 we are due an additional \$0.5 million related to achievement of a milestone in connection with the license of rights to CR845 in Japan to Maruishi Pharmaceutical Co., Ltd., ("Maruishi"). In 2012, we received aggregate upfront and milestone payments of \$1.2 million pursuant to a license agreement with Chong Kun Dang Pharmaceutical Corporation ("CKD"), in connection with the license of rights to CR845 in South Korea.

Since inception, we have incurred significant operating and net losses. Our net loss was \$3.6 million and \$7.0 million for the three and six months ended June 30, 2014, respectively. As of June 30, 2014, we had an accumulated deficit of \$69.5 million. We expect to continue to incur significant expenses and operating and net losses over at least the next several years. Our net losses may fluctuate significantly from quarter to quarter and year to year, depending on the timing of our clinical trials, the receipt of additional milestone payments, if any, under our collaborations with Maruishi and CKD, the receipt of payments under any future collaborations we may enter into, and our expenditures on other research and development activities. Although we have incurred significant operating and net losses in almost every fiscal quarter since inception, we generated net income of \$5.3 million and \$2.7 million for the three and six months ended June 30, 2013, respectively, due to recognition of \$9.6 million of license revenue from our collaboration with Maruishi during those periods.

We anticipate that our expenses will increase substantially as we:

- initiate our planned Phase 3 clinical trials of I.V. CR845;
- continue the research and development of our Oral CR845 and other product candidates;
- seek regulatory approvals for I.V. CR845 and any product candidates that successfully complete clinical trials;
- establish a sales, marketing and distribution infrastructure and scale up external manufacturing capabilities to commercialize any products for which we may obtain regulatory approval;
- maintain, expand and protect our global intellectual property portfolio;

---

## [Table of Contents](#)

- hire additional clinical, quality control and scientific personnel; and
- add operational, financial and management information systems and personnel, including personnel to support our drug development and potential future commercialization efforts.

In addition, we have incurred and will continue to incur significant expenses as a result of our having become a public company, which subjects us to the reporting requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Sarbanes-Oxley Act of 2002 and the rules and regulations of The NASDAQ Global Market. Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, or Section 404, we will be required to furnish a report by our management on our internal control over financial reporting. Commencing with our fiscal year ending December 31, 2014, we must perform system and process evaluation and testing of our internal control over financial reporting to allow management to report on the effectiveness of our internal control over financial reporting in our Form 10-K filing for that year, as required by Section 404. However, while we remain an emerging growth company, we will not be required to include an attestation report on internal controls over financial reporting issued by our independent registered public accounting firm.

To achieve compliance with Section 404 within the prescribed period, we are engaged in a process of documenting and evaluating our internal control over financial reporting using the 2013 Internal Control – Integrated Framework established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). This process is both costly and challenging. In this regard, we are continuing to dedicate internal resources and have engaged outside consultants. We are adopting a detailed work plan to assess and document the adequacy of internal control over financial reporting, continuing steps to improve control processes, as appropriate, validating through testing that controls are functioning as documented and implementing a continuous reporting and improvement process for internal control over financial reporting.

To fund future operations, we may need to raise additional capital. As of June 30, 2014, we had cash and cash equivalents of approximately \$62.8 million. We may obtain additional financing in the future through the issuance of our common stock, through other equity or debt financings or through collaborations or partnerships with other companies. We may not be able to raise additional capital on terms acceptable to us, or at all, and any failure to raise capital as and when needed could compromise our ability to execute on our business plan. Although it is difficult to predict future liquidity requirements, we believe that our existing cash and cash equivalents, together with interest thereon, will be sufficient to fund our operations for at least the next 18 months without giving effect to any potential milestone payments we may receive under our collaboration agreements. However, our ability to successfully transition to profitability will be dependent upon achieving a level of revenues adequate to support our cost structure. We cannot assure you that we will ever be profitable or generate positive cash flow from operating activities.

## **Components of Operating Results**

### ***Revenue***

To date, we have not generated any revenue from product sales and do not expect to generate any revenue from the sale of products in the near future. Substantially all of our revenue recognized to date has been generated by upfront payments under license agreements with Maruishi and CKD for CR845, a portion of which was deferred upon receipt, as well as license agreements for CR665, our first generation drug program for which development efforts have ceased. However, we have not received any significant clinical development or regulatory milestone payments, or any royalties, under these collaborations.

### ***Research and Development***

To date, our research and development expenses have related primarily to the development of CR845. Research and development expenses consist of expenses incurred in performing research and development activities, including compensation and benefits for full-time research and development employees, facilities expenses, including laboratory build-out costs, overhead expenses, cost of laboratory supplies, clinical trial and related clinical manufacturing expenses, third-party formulation expenses, fees paid to contract research organizations, or CROs, and other consultants, stock-based compensation for research and development employees and non-employee consultants and other outside expenses. Our research and development expenses also include expenses related to preclinical activities, such as drug discovery, target validation and lead optimization for CR845 and our other, earlier stage programs.

Research and development costs are expensed as incurred. Non-refundable advance payments for goods or services to be received in the future for use in research and development activities are deferred and capitalized. The capitalized amounts are expensed as the related goods are delivered or the services are performed. Most of our research and development costs have been external costs, which we track on a program-by-program basis. Our internal research and development costs are primarily compensation expenses for our fulltime research and development employees. We do not track internal research and development costs on a program-by-program basis.

---

## [Table of Contents](#)

Research and development activities are central to our business model. Product candidates in later stages of clinical development generally have higher development costs than those in earlier stages of clinical development, primarily due to the increased size and duration of later-stage clinical trials. We expect our research and development expenses to increase significantly over the next several years as we seek to progress I.V. CR845 through Phase 3 trials and the FDA approval process. However, it is difficult to determine with certainty the duration and completion costs of our current or future preclinical programs and clinical trials of our product candidates, or if, when or to what extent we will generate revenues from the commercialization and sale of any of our product candidates that obtain regulatory approval. We may never succeed in achieving regulatory approval for any of our product candidates.

The duration, costs and timing of clinical trials and development of our product candidates will depend on a variety of factors including:

- per patient trial costs;
- the number of patients that participate in the trials;
- the number of sites included in the trials;
- the countries in which the trial is conducted;
- the length of time required to enroll eligible patients;
- the number of doses that patients receive;
- the drop-out or discontinuation rates of patients;
- potential additional safety monitoring or other studies requested by regulatory agencies;
- the duration of patient follow-up; and
- the efficacy and safety profile of the product candidate.

In addition, the probability of success for each product candidate will depend on numerous factors, including: competition, manufacturing capability and commercial viability. We will determine which programs to pursue and how much to fund each program in response to the scientific and clinical success of each product candidate, as well as an assessment of each product candidate's commercial potential.

### ***General and Administrative***

General and administrative expenses consist primarily of salaries and other related costs, including stock-based compensation, for personnel in executive, finance, accounting, business development and human resources functions. Other significant costs include facility costs not otherwise included in research and development expenses, legal fees and fees for accounting and consulting services.

We anticipate that our general and administrative expenses will increase in the future to support our continued research and development activities, potential commercialization of our product candidates and the increased costs of operating as a public company. These increases will likely include increased costs related to the hiring of additional personnel and fees to outside consultants, lawyers and accountants, as well as expenses related to services associated with maintaining compliance with NASDAQ listing rules and SEC requirements, insurance, and investor relations costs. In addition, if I.V. CR845 or any future product candidate obtains regulatory approval for marketing, we expect to incur expenses associated with building a sales and marketing team.

### ***Interest Income (Expense), Net***

Interest income (expense), net, consists of interest paid on debt instruments, amortized deferred financing costs and amortized debt discount, as offset by any interest income earned on our cash and cash equivalents. The debt discount primarily consists of the intrinsic value of the beneficial conversion feature embedded in the convertible promissory notes we issued in December 2012 and February 2013. All convertible promissory notes were either converted to shares of series D convertible preferred stock or repaid prior to December 31, 2013.

---

[Table of Contents](#)**Benefit from Income Taxes**

The benefit from income taxes relates to state research and development tax credits exchanged for cash pursuant to the Connecticut Research and Development Tax Credit Exchange Program, which permits qualified small businesses engaged in research and development activities within Connecticut to exchange their unused research and development tax credits for a cash amount equal to 65% of the value of the exchanged credits.

**Results of Operations**

*Comparison of the Three Months Ended June 30, 2014 and 2013*

The following table sets forth our results of operations for the three months ended June 30, 2014 and 2013 (in thousands):

	<u>Three Months Ended June 30,</u>		<u>Period-to-Period Change</u>
	<u>2014</u>	<u>2013</u>	
Revenue:			
License fees	\$ 302	\$ 9,637	\$ (9,335)
Collaborative revenue	658	336	322
Total revenue	<u>960</u>	<u>9,973</u>	<u>(9,013)</u>
Cost and expenses:			
Research and development	3,200	2,021	1,179
General and administrative	1,472	1,033	439
	<u>4,672</u>	<u>3,054</u>	<u>1,618</u>
Operating (loss) income	(3,712)	6,919	(10,631)
Interest income (expense), net	56	(1,602)	1,658
(Loss) income before benefit from income taxes	(3,656)	5,317	(8,973)
Benefit from income taxes	11	20	(9)
Net (loss) income	<u>\$ (3,645)</u>	<u>\$ 5,337</u>	<u>\$ (8,982)</u>

**Revenue**

License fee revenue decreased \$9.3 million to \$0.3 million for the three months ended June 30, 2014, compared to the same period of 2013. The decrease was primarily the result of our recognition as license revenue of \$0.3 million related to achievement of a milestone in June 2014 under the license agreement with Maruishi and \$9.6 million of the upfront payment received from the execution of the license agreement with Maruishi in April 2013. Of the remaining \$0.2 million of the milestone payment earned during the three months ended June 30, 2014, \$0.1 million was recognized as collaborative revenue and \$0.1 million was deferred. Collaborative revenue increased \$0.3 million to \$0.7 million for the three months ended June 30, 2014 compared to the same period of 2013. Collaborative revenue for the three months ended June 30, 2014 and 2013 included \$526 thousand and \$306 thousand, respectively, of revenue that had been deferred upon entry into the license agreement with Maruishi and \$132 thousand and \$30 thousand, respectively, from the sale of clinical compound.

**Research and Development Expense**

Research and development expenses increased by \$1.2 million to \$3.2 million, for the three months ended June 30, 2014, compared to the same period of 2013. The increase was primarily the result of a \$0.7 million increase in direct preclinical studies and clinical trial costs, a \$0.1 million increase in consultant services in support of preclinical studies and clinical trials and a \$0.1 million increase in stock-based compensation expense. The increase in clinical trial costs resulted from the CR845 drug manufacturing costs, Phase 1 Oral CR845 trial and tablet formulation costs, and the Phase 2 IV CR845 hemodialysis/uremic pruritus trial preparation costs.

---

**[Table of Contents](#)**

The following table summarizes our research and development expenses by product candidate for the three months ended June 30, 2014 and 2013 (in thousands):

	<b>Three Months Ended June 30,</b>	
	<b>2014</b>	<b>2013</b>
<b>External research and development expenses:</b>		
I.V. CR845	\$ 1,053	\$ 979
Oral CR845	1,193	383
<b>Internal research and development expenses</b>	<b>954</b>	<b>659</b>
<b>Total research and development expenses</b>	<b>\$ 3,200</b>	<b>\$ 2,021</b>

***General and Administrative Expenses***

General and administrative expenses increased by \$0.4 million, to \$1.5 million, for the three months ended June 30, 2014, compared to the same period of 2013. The increase was primarily attributable to increases of \$0.3 million in stock-based compensation expense, \$0.2 million in insurance costs, \$0.1 million in payroll and related costs, \$0.1 million in public/investor relations costs and \$0.1 million in professional fees, including director fees and accounting and auditing fees, partially offset by a decrease of \$0.3 million in consultant costs, primarily related to the success fee associated with obtaining the Maruishi license agreement in 2013.

***Interest Income (Expense), net***

Interest income (expense), net, was \$56 thousand of interest income earned on our cash and cash equivalents for the three months ended June 30, 2014 compared to \$1.6 million of interest expense for the same period of 2013. The decrease in interest expense was due to the outstanding convertible promissory notes in 2013, which had resulted in \$1.6 million of non-cash expenses during the three months ended June 30, 2013, including the accretion of debt discount relating to the intrinsic value of the beneficial conversion feature embedded in the notes and amortization of deferred financing costs, and accrued interest expense.

***Benefit from Income Taxes***

For the three months ended June 30, 2014 and 2013, pre-tax (loss) income was \$(3.7 million) and \$5.3 million, respectively, and we recognized a benefit from income taxes of \$11 thousand and \$20 thousand, respectively. The benefit from income taxes relates to state research and development tax credits exchanged for cash pursuant to the Connecticut Research and Development Tax Credit Exchange Program, as discussed above. We recognized a full valuation allowance against net deferred tax assets at June 30, 2014 and December 31, 2013.

---

**Table of Contents***Comparison of the Six Months Ended June 30, 2014 and 2013*

The following table sets forth our results of operations for the six months ended June 30, 2014 and 2013 (in thousands):

	<u>Six Months Ended June 30,</u>		<u>Period- to- Period Change</u>
	<u>2014</u>	<u>2013</u>	
Revenue:			
License fees	\$ 302	\$ 9,637	\$ (9,335)
Collaborative revenue	836	336	500
Total revenue	<u>1,138</u>	<u>9,973</u>	<u>(8,835)</u>
Cost and expenses:			
Research and development	5,401	2,943	2,458
General and administrative	2,870	1,621	1,249
	<u>8,271</u>	<u>4,564</u>	<u>3,707</u>
Operating (loss) income	<u>(7,133)</u>	<u>5,409</u>	<u>(12,542)</u>
Interest income (expense), net	78	(2,731)	2,809
(Loss) income before benefit from income taxes	<u>(7,055)</u>	<u>2,678</u>	<u>(9,733)</u>
Benefit from income taxes	27	27	—
Net (loss) income	<u>\$ (7,028)</u>	<u>\$ 2,705</u>	<u>\$ (9,733)</u>

**Revenue**

License fee revenue decreased \$9.3 million to \$0.3 million for the six months ended June 30, 2014, compared to the same period of 2013. The decrease was primarily the result of our recognition as license revenue of \$0.3 million related to achievement of a milestone in June 2014 under the license agreement with Maruishi and \$9.6 million of the upfront payment received from the execution of the license agreement with Maruishi in April 2013. Of the remaining \$0.2 million of the milestone payment earned during the three months ended June 30, 2014, \$0.1 million was recognized as collaborative revenue and \$0.1 million was deferred. Collaborative revenue increased \$0.5 million to \$0.8 million for the six months ended June 30, 2014 compared to the same period of 2013. Collaborative revenue for the six months ended June 30, 2014 and 2013 included \$677 thousand and \$306 thousand, respectively, of revenue that had been deferred upon entry into the license agreement with Maruishi and \$159 thousand and \$30 thousand, respectively, from the sale of clinical compound.

**Research and Development Expense**

Research and development expenses increased by \$2.5 million to \$5.4 million, for the six months ended June 30, 2014, compared to the same period of 2013. The increase was primarily the result of a \$1.9 million increase in direct preclinical studies and clinical trial costs, a \$0.2 million increase in consultant services in support of preclinical studies and clinical trials and a \$0.2 million increase in stock-based compensation expense. The increase in clinical trial costs resulted from CR845 drug manufacturing costs, Phase 1 Oral CR845 trial and tablet formulation costs and Phase 1 IV CR845 renal impairment trial costs.

## [Table of Contents](#)

The following table summarizes our research and development expenses by product candidate for the six months ended June 30, 2014 and 2013 (in thousands):

	<u>Six Months Ended June 30,</u>	
	<u>2014</u>	<u>2013</u>
External research and development expenses:		
I.V. CR845	\$ 2,093	\$ 1,223
Oral CR845	1,678	389
Internal research and development expenses	1,630	1,331
Total research and development expenses	<u>\$ 5,401</u>	<u>\$ 2,943</u>

### ***General and Administrative Expenses***

General and administrative expenses increased by \$1.2 million, to \$2.9 million, for the six months ended June 30, 2014, compared to the same period of 2013. The increase was primarily attributable to increases of \$0.6 million of stock-based compensation expense, \$0.3 million of professional fees, including accounting, legal and directors' fees, \$0.3 million in insurance costs, \$0.2 million in public/investor relations costs related to our IPO and \$0.1 million of payroll and related costs, partially offset by a decrease of \$0.3 million in consultant costs, primarily related to the success fee associated with obtaining the Maruishi license agreement in 2013.

### ***Interest Income (Expense), net***

Interest income (expense), net, was \$78 thousand of interest income earned on our cash and cash equivalents for the six months ended June 30, 2014 compared to \$2.7 million of interest expense for the six months ended June 30, 2013. The decrease in interest expense was due to the outstanding convertible promissory notes during 2013, which had resulted in \$2.7 million of non-cash expenses during the six months ended June 30, 2013, including the accretion of debt discount relating to the intrinsic value of the beneficial conversion feature embedded in the notes and amortization of deferred financing costs, and accrued interest expense.

### ***Benefit from Income Taxes***

For the six months ended June 30, 2014 and 2013, pre-tax (loss) income was \$(7.1 million) and \$2.7 million, respectively, and we recognized a benefit from income taxes of \$27 thousand and \$27 thousand, respectively. The benefit from income taxes relates to state research and development tax credits exchanged for cash pursuant to the Connecticut Research and Development Tax Credit Exchange Program, as discussed above. We recognized a full valuation allowance against net deferred tax assets at June 30, 2014 and December 31, 2013.

## **Liquidity and Capital Resources**

### ***Sources of Liquidity***

Since our inception and through June 30, 2014, we have raised an aggregate of approximately \$158.8 million to fund our operations, including primarily proceeds of \$56.2 million, net of underwriting discounts and commissions and offering expenses, from our IPO, which closed in February 2014, \$28.9 million received under our license agreements, primarily with Maruishi and CKD, \$65.9 million of proceeds from the sale of shares of our convertible preferred stock, including Junior A convertible preferred stock (see below), and \$7.4 million of net proceeds from debt financings, including convertible promissory notes (see below). As of June 30, 2014, we had \$62.8 million in cash and cash equivalents.

In addition to our existing cash and cash equivalents, under our agreement with Maruishi, we are potentially eligible to earn up to an aggregate of \$6.0 million in clinical development milestones and \$4.5 million in regulatory milestones as well as tiered royalties, with percentages ranging from the low double digits to the low twenties, based on net sales of products containing CR845 in Japan, if any, and share in any sub-license fees. During June 2014, Maruishi completed a Phase 1 clinical trial in Japan related to CR845 in acute post-operative pain for which, as of June 30, 2014, we are due a clinical development milestone payment of \$0.5 million. Under our agreement with CKD, we are potentially eligible to earn up to an aggregate of \$2.3 million in clinical development milestones and \$1.5 million in regulatory milestones as well as tiered royalties with percentages ranging from the high single digits to the high teens, based on net sales of products containing CR845 in South Korea, if any, and share in any sub-license fees. Our ability to earn these payments and their timing is dependent upon the outcome of I.V. and Oral CR845 development activities and, potentially, commercialization. However, our receipt of any further such amounts is uncertain at this time and we may never receive any more of these amounts.

---

## [Table of Contents](#)

We believe that, as of June 30, 2014, cash and cash equivalents on hand will be sufficient to fund our operations for the next 18 months without giving effect to any potential milestone payments we may receive under our collaboration agreements.

### *Convertible Promissory Notes*

During February 2013, we issued \$1.5 million principal amount of convertible promissory notes, due August 28, 2013, in addition to the \$2.5 million principal amount of convertible promissory notes due August 28, 2013 that were issued in December 2012 (total aggregate amount of convertible promissory notes issued was \$4.0 million). The notes bore interest at 8% per annum and included both optional and mandatory conversion features. The optional conversion feature allowed each note holder, at any time prior to maturity, to elect to convert the balance of the note plus accrued interest into shares of our Series D convertible preferred stock at a conversion price of approximately \$1.44 per share. The mandatory conversion feature of the notes provided that, if we issued or sold equity securities of not less than \$10.0 million on or before the maturity date, the notes plus all accrued interest thereon would automatically convert into shares of the issued class of equity securities at a price per share equal to 90% of the cash price paid by the investors in the new equity securities.

We did not need to complete an equity financing prior to August 28, 2013, which would have triggered the mandatory conversion of the notes. In August 2013, certain holders of notes elected to convert their notes in the aggregate amount of \$3.9 million in principal plus accrued interest thereon into 2,692,291 shares of our Series D convertible preferred stock. In October 2013, we repaid the remaining notes in the aggregate amount of \$311 thousand in principal and accrued interest thereon.

### *Junior A Convertible Preferred Stock*

Under the terms of the Maruishi agreement, during April 2013, Maruishi purchased 2,105,263 shares of our Junior A convertible preferred stock pursuant to a stock purchase agreement for a purchase price of \$8.0 million. These shares have been recorded at their fair value of \$7.7 million. As a result, the premium of \$0.3 million was allocated to the arrangement consideration and was, therefore, recognized as license fee revenue in accordance with our revenue recognition policies.

### **Funding Requirements**

Our primary uses of capital have been, and we expect will continue to be, compensation and related expenses, third-party clinical research and development services, laboratory and related supplies, clinical costs, legal and other regulatory expenses and general overhead costs. See Part II Item 2, *Unregistered Sales of Equity Securities and Use of Proceeds*, below, regarding the use of the net proceeds from our IPO.

The successful development of any of our product candidates is highly uncertain. As such, at this time, we cannot reasonably estimate or know the nature, timing and costs of the efforts that will be necessary to complete the development of I.V. CR845, Oral CR845 or our other current and future product candidates. We are also unable to predict when, if ever, we will generate any further material net cash inflows from CR845. This is due to the numerous risks and uncertainties associated with developing medicines, including the uncertainty of:

- successful enrollment in, and completion of clinical trials;
- receipt of marketing approvals from applicable regulatory authorities;
- establishing commercial manufacturing capabilities or making arrangements with third-party manufacturers;
- obtaining and maintaining patent and trade secret protection and regulatory exclusivity for our product candidates;
- launching commercial sales of the products, if and when approved, whether alone or in collaboration with others;
- achieving meaningful penetration in the markets which we seek to serve; and
- obtaining adequate coverage or reimbursement by third parties, such as commercial payors and government healthcare programs, including Medicare and Medicaid.

A change in the outcome of any of these variables with respect to the development of I.V. CR845, Oral CR845 or any of our future product candidates would significantly change the costs and timing associated with the development of that product candidate.

---

## [Table of Contents](#)

Because our product candidates are still in the early stages of clinical and preclinical development and the outcome of these efforts is uncertain, we cannot estimate the actual amounts necessary to successfully complete the development and commercialization of our product candidates or whether, or when, we may achieve profitability. Until such time, if ever, as we can generate substantial product revenues, we expect to finance our cash needs through a combination of equity or debt financings and collaboration arrangements, including our existing collaboration agreements with Maruishi and CKD.

In addition, we have incurred and will continue to incur significant expenses as a result of our having become a public company in January 2014, which subjects us to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act of 2002 and the rules and regulations of The NASDAQ Global Market (see *Overview*, above).

We may require additional capital beyond our currently anticipated amounts and this additional capital may not be available when needed, on reasonable terms, or at all. To the extent that we raise additional capital through the future sale of equity or convertible debt, the ownership interest of our stockholders will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect the rights of our existing common stockholders. If we raise additional funds through the issuance of debt securities, these securities could contain covenants that would restrict our operations. If we raise additional funds through collaboration arrangements in the future, we may have to relinquish valuable rights to our technologies, future revenue streams or product candidates or grant licenses on terms that may not be favorable to us. If we are unable to raise additional funds through equity or debt financings when needed, we may be required to delay, limit, reduce or terminate our drug development or future commercialization efforts or grant rights to develop and market product candidates that we would otherwise prefer to develop and market ourselves.

### ***Outlook***

Based on our research and development plans and our timing expectations related to the progress of our programs, we expect that our existing cash and cash equivalents as of June 30, 2014 will enable us to fund our operating expenses and capital expenditure requirements for at least the next 18 months, without giving effect to any potential milestone payments we may receive under our collaboration agreements. Because the process of testing product candidates in clinical trials is costly and the timing of progress in these trials is uncertain, it is possible that the assumptions upon which we have based this estimate may prove to be wrong, and we could use our capital resources sooner than we presently expect.

### ***Cash Flows***

The following is a summary of the net cash flows provided by (used in) our operating, investing and financing activities for the six months ended June 30, 2014 and 2013 (in thousands):

	<b>Six Months Ended June 30,</b>	
	<b>2014</b>	<b>2013</b>
Net cash (used in) provided by operating activities	\$ (7,330)	\$ 11,334
Net cash (used in) investing activities	(6)	—
Net cash provided by financing activities	57,791	8,727
Net increase in cash and cash equivalents	<u>\$ 50,455</u>	<u>\$ 20,061</u>

### ***Net cash (used in) provided by operating activities***

For the six months ended June 30, 2014, net cash used in operating activities was \$7.3 million compared to net cash provided by operating activities of \$11.3 million for the six months ended June 30, 2013. The \$18.6 million increase in net cash used in operating activities was due to an increase in net loss, net of non-cash charges, in addition to an increase in outflows related to changes in operating assets and liabilities.

For the six months ended June 30, 2014, non-cash charges primarily consisted of depreciation and amortization expense of \$0.4 million and stock-based compensation expense of \$0.8 million, partially offset by deferred rent costs of \$0.1 million. The net change in operating assets and liabilities primarily consisted of cash outflows of \$0.6 million of prepaid and other current assets, primarily related to prepaid insurance and prepaid clinical costs, \$0.5 million of other receivables related to the milestone payment due from Maruishi and \$0.4 million of deferred revenue from the Maruishi license transaction, partially offset by cash inflow of \$0.1 million of accounts payable and accrued expenses.

---

## [Table of Contents](#)

For the six months ended June 30, 2013, non-cash charges primarily consisted of aggregate non-cash interest and amortization of beneficial conversion feature on our convertible promissory notes of \$2.6 million and depreciation and amortization expense of \$0.4 million, partially offset by deferred rent costs of \$0.1 million. The net change in operating assets and liabilities primarily consisted of cash inflows of \$5.4 million of deferred revenue related to the Maruishi license agreement and \$0.3 million in accounts payable and accrued expenses.

### *Net cash used in investing activities*

Net cash used in investing activities was \$6 thousand for the six months ended June 30, 2014 related to the purchase of office computers. There were no investing activities for the six months ended June 30, 2013.

### *Net cash provided by financing activities*

Net cash provided by financing activities was \$57.8 million for the six months ended June 30, 2014, which consisted primarily of gross proceeds of \$63.2 million from our initial public offering, partially offset by \$5.5 million of underwriting discounts and commissions and offering expenses paid in the six months ended June 30, 2014.

Net cash provided by financing activities was \$8.7 million for the six months ended June 30, 2013, which consisted primarily of \$7.6 million of proceeds received from the sale of Junior A convertible preferred stock and \$1.4 million of net proceeds received from the issuance of convertible promissory notes, partially offset by the repayment of long-term debt (Connecticut Innovations Inc. loan) of \$0.3 million.

## **Significant Contractual Obligations and Commitments**

Contractual obligations and commitments as of June 30, 2014 included those related to employment agreements with executive officers that were entered into in January 2014, in addition to operating lease obligations related to our operating facility in Shelton, Connecticut. See Note 13 of Notes to Condensed Financial Statements in this Quarterly Report on Form 10-Q.

## **Recent Accounting Pronouncement**

In May 2014, the FASB issued Accounting Standards Update 2014-09, *Revenue from Contracts with Customers (Topic 606)* ("ASU 2014-09"). ASU 2014-09 provides a single authoritative source of guidance and, thereby, is meant to significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets. ASU 2014-09 changes the principle under which we will recognize revenue from contracts with customers from one which requires us to satisfy specific criteria before recognizing revenue to one which requires us to recognize revenue in an amount that reflects the consideration to which we expect to be entitled in exchange for the transfer of promised goods or services to customers. The amount of revenue to be recognized in any reporting period is determined by applying the following steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract and (5) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 is effective for us for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period (i.e., January 1, 2017). Early application is not permitted. We are allowed to adopt ASU 2014-09 either (1) retrospectively to each prior reporting period presented using several practical expedients related to completed contracts and required disclosures, or (2) retrospectively with the cumulative effect of initially applying ASU 2014-09 recognized at the date of initial application, including disclosure of the effect of using this method of adoption on the financial statement line items. We are currently in the process of deciding which method of adoption we will use and the effect of adoption of ASU 2014-09 on our results of operations, financial position and cash flows.

## **Off-Balance Sheet Arrangements**

We did not have during the periods presented, and we do not currently have, any off-balance sheet arrangements, as defined under SEC rules.

## **Discussion of Critical Accounting Policies**

The preparation of financial statements in conformity with GAAP requires us to use judgment in making certain estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses in our condensed financial statements and accompanying notes. Critical accounting policies are those that are most important to the portrayal of our financial condition and results of operations and require difficult, subjective and

---

[Table of Contents](#)

complex judgments by management in order to make estimates about the effect of matters that are inherently uncertain. During the six months ended June 30, 2014, there were no significant changes to our critical accounting policies from those described in our Annual Report on Form 10-K for the year ended December 31, 2013.

**Item 3. *Quantitative and Qualitative Disclosures About Market Risk.***

The market risk inherent in our financial instruments and in our financial position represents the potential loss arising from adverse changes in interest rates. As of June 30, 2014 and December 31, 2013, we had cash and cash equivalents of \$62.8 million and \$12.4 million, respectively. We generally hold our cash equivalents in interest-bearing money market accounts. Our primary exposure to market risk is interest rate sensitivity, which is affected by changes in the general level of U.S. interest rates. Due to the short-term maturities of our cash equivalents and the low risk profile of our investments, an immediate 100 basis point change in interest rates would not have a material effect on the fair market value of our cash equivalents.

**Item 4. *Controls and Procedures.***

**(a) Disclosure Controls and Procedures.**

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 30, 2014. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost benefit relationship of possible controls and procedures. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of June 30, 2014, our disclosure controls and procedures were effective.

**(b) Changes in Internal Control Over Financial Reporting**

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(f) and 15d-15(f) of the Exchange Act that occurred during the quarter ended June 30, 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**PART II**  
**OTHER INFORMATION**

**Item 1. Legal Proceedings**

From time to time, we are subject to litigation and claims arising in the ordinary course of business. We are not currently a party to any material legal proceedings and we are not aware of any pending or threatened legal proceedings against us that we believe could have a material adverse effect on our business, operating results or financial condition.

**Item 1A. Risk Factors.**

Please refer to *Item 1A. Risk Factors* in our Annual Report on Form 10-K for the year ended December 31, 2013, filed with the SEC on March 28, 2014, for a description of certain significant risks and uncertainties to which our business, operations and financial condition are subject. During the six months ended June 30, 2014, we did not identify any additional risk factors or any material changes to the risk factors discussed in the Annual Report on Form 10-K for the year ended December 31, 2013.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

*Use of IPO Proceeds*

On January 30, 2014, our registration statement on Form S-1 (File No 333-192230) was declared effective by the SEC for our initial public offering, pursuant to which we registered the offering and sale of 5,750,000 shares of common stock, \$0.001 par value per share (including 750,000 shares issued upon the underwriters' exercise of an option to purchase additional shares) at a public offering price of \$11.00 per share for an aggregate public offering price of \$63.2 million.

As a result of the initial public offering, we received net proceeds on February 5, 2014 of approximately \$58.8 million from the sale of 5,750,000 shares of common stock, after deducting approximately \$4.4 million of underwriting discounts and commissions but before giving effect to any offering expenses borne by us. In addition, as of June 30, 2014, we have paid or accrued approximately an additional \$2.6 million of offering expenses in connection with the IPO. None of such payments were direct or indirect payments to any of (i) our directors or officers or their associates, (ii) persons owning 10 percent or more of our common stock, or (iii) our affiliates.

There has been no material change in the planned use of proceeds from our initial public offering from that described in the final prospectus related to the offering, which we filed with the SEC on February 3, 2014. As of June 30, 2014, we have used approximately \$3.5 million of the funds received from our IPO for clinical trials and payments to research and development consultants.

**Item 3. Defaults upon Senior Securities.**

None.

**Item 4. Mine Safety Disclosures.**

Not applicable.

**Item 5. Other Information.**

None.

**Certification of Chief Executive Officer Pursuant to  
Rule 13a-14(a) under the Securities Exchange Act  
of 1934, as Adopted Pursuant to  
Section 302 of the Sarbanes-Oxley Act of 2002**

I, Derek Chalmers, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Cara Therapeutics, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (c) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

JOSEF SCHOELL  
CHIEF FINANCIAL OFFICER

**CERTIFICATIONS OF  
CHIEF EXECUTIVE OFFICER AND CHIEF FINANCIAL OFFICER  
OF CARA THERAPEUTICS, INC.  
PURSUANT TO 18 U.S.C. SECTION 1350,  
AS ADOPTED PURSUANT TO SECTION 906 OF THE  
SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report on Form 10-Q of Cara Therapeutics, Inc. (the "Company") for the quarter ended June 30, 2014, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Derek Chalmers, Ph.D., as Chief Executive Officer of the Company, and Josef Schoell, as Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of his knowledge, based upon a review of the Report:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
